Election/Restrictions

Claims in the application are 1-6.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- 5 I. Claims 1-3, 5 and 6, drawn to a scaffold for tissue engineering comprising microcarriers and method of regenerating tissue using the scaffold, classified in class 424, subclass 93.7.
- II. Claim 4, drawn to a method producing scaffolds for tissue engineering by preparing microcarrier, bonding the
- 10 microcarriers into a scaffold and seeding the scaffold with cells, classified in class 435, subclass 395.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following

15 can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the scaffold of invention I can be made by a materially different process than required by the method of

20 invention II. The scaffold can be prepared without bonding the microcarriers into a scaffold as required by II such as by making a porous polymer scaffold containing the microcarriers entrapped in pores of the polymer scaffold where there is no bonding of microcarriers. Additionally, the scaffold prepared by the method of

25 invention II can be used for a method other than regenerating tissue

as required by claim 5 of invention I such as to culture cells to produce a metabolic product of the cells.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their
5 different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a
15 request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process
20 claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to
25 final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction
30 between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an

Art Unit: 1651

elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See

5 "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain

10 dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before

15 the patent issues. See MPEP § 804.01.
